EXPLORATION**

House inspections for the fiber optic house connection

We at Deutscher Bauservice offer you technically competent resources for the implementation of your fiber optic project.

To ensure a smooth construction process, our field-service team is on site at your connection recipients in advance to record and log all relevant conditions. We work throughout Germany as a full-service provider, all costs included.

Trust the german market leader
- we have on record more than 100,000
successful site exploration.

 Expensive house inspections
for the FTTH connection

Recording of all relevant local conditions using
image material and logging.

 We are your partner!

It doesn't matter whether it's a few hundred
or several thousand address points.

 Delivery of documents for the
fiber optic house inspections

We prepare the documents for the
on-site inspections.

Do you plan house inspections?

For the successful installation of the fiber optic house connection, the conditions at the location of the connection must be checked. This allows for optimal positioning of the lines to be logged and sketched and advise your connection users according to your specifications and wishes.

We advise your subscribers individually according to your specifications and wishes. From scheduling to the final upload to the customer system, we take care of every step - including the entire house connection management on request.

The service package includes:

- | | | |
|---|--|---|
| » Dispositioning and scheduling of the properties required to be inspected. | » Determination of the installation points in the home of the property owner. | » Post-inspection documentation of the plausibility and quality |
| » Inspections include: Measurement and digital recording according to client specifications, signature and optional declaration of power of attorney by the property owner. | » Drawing in the sketch of the property and the planned course of the line on the property. | » Recording of the local conditions using a camera and in combination with the applicable report. |
| | » Optional: Calculation and explanation of the additional costs incurred for the property owner. | » The Service-Management can be reached by e-mail and telephone for any questions from property owners during the project period. |

Benefits
